PROFILE

I am Engr. Mustapha Mandara, known across the Web3 industry as Devmustee — a software engineer, Web3 ecosystem strategist and technology entrepreneur. I build software, contribute to blockchain ecosystems, mentor emerging builders and develop technology-driven solutions.

I have been building software since 2011, hold degrees in Computer Engineering and Software Engineering, and have been active in the Web3 industry since 2016. My work spans software development, blockchain ecosystems, technical community growth, developer relations, mentorship and technology entrepreneurship.

I believe technology should solve real problems, create opportunities and make innovation accessible to more people.

EXPERIENCE

Founder & CEO — Raven Network 2024 – Present

Raven Network is an African Web3 and AI contributor network connecting emerging talent to global opportunities.

- Founded and lead a Web3 and AI talent infrastructure company.
- Drive product strategy, technology development and business growth.
- Build relationships with Web3 and technology companies.
- Develop talent onboarding, training and contribution pathways.
- Support developers, creators, marketers and other contributors.
- Lead ecosystem expansion and strategic initiatives.

Marketing Lead — Elympics AI 2025

- Web3 marketing strategy.
- Community growth.
- Ecosystem positioning.
- Campaign execution.

African Regional Leader — Metya AI 2025

- Regional ecosystem development.
- African community engagement.
- Growth initiatives.
- Partnership and community activities.

Exchange Partner — Bitget 2025

- Ecosystem participation as a Bitget exchange partner.
- Exchange relationship and partnership engagement.
- Community engagement.

Ambassador · Intern to Global Community Lead — TON Foundation 2024

Contribution to the TON ecosystem across community, education and builder support.

- Supported Viktor, TON's Global Community Lead, in growing and educating the global TON community (10M+ members) and keeping it up to date on ecosystem developments.
- Spoke in major TON X Spaces alongside the Global Community Lead.
- As the software engineer on the team, explained the technical side of TON developments, put technical questions to projects and answered the community's technical questions.
- Engaged community members, contributors and projects building on or integrating TON, including LayerZero, Sign, Notcoin, DOGS, Catizen and major TON games that raised $20–30M.
- Organised 6+ TON community activations across Africa, attended by 3,000+ people.
- Lectured on building on TON and Telegram at Pixelfest 2024, to 7,000+ key opinion leaders.
- Represented TON at the Web3 Global Conference.

Two distinct engagements: TON Ambassador, and an internship supporting the Global Community Lead. The internship was not an executive appointment.

Global Community Moderator — TON Syndicate

- Moderated TON's global community on Telegram as part of the TON Syndicate.
- Learned directly from industry leaders through internal training sessions, Syndicate calls, Builders Calls and Community Building and Strategy calls sponsored by the TON Foundation for capacity building.
- Worked with Inal Kardan of TON Ventures, in person and virtually.
- Learned from Manuel Stotz of TON Strategy Company.

Lead — TON Developers Group 2024 – 2026

- Led the TON Developers group from 2024 to 2026, supporting builders working on TON.

KOL Lead — Bitget Wallet 2024

Joined in 2024, when Bitget Wallet backed the TON ecosystem with TONNET, a $40M initiative — referred by the Global Community Lead of TON.

- Represented Bitget Wallet at Idea TON 2024 — presented the Bitget Wallet ecosystem and walked through its pitch.
- KOL and creator ecosystem engagement.
- Web3 marketing and growth.
- Community activation.
- Influencer relationship development.

Marketing Lead — Yum Party 2024

- Marketing and community growth.
- Web3 ecosystem engagement.

Token Verification Contributor — TON Assets 2025 – Present

- Contribute to verifying tokens for the TON Assets registry.

Mentor — TON Nest

- Mentor founders and builders.
- Support teams building on TON.
- Review project ideas and product direction.
- Help founders understand ecosystem opportunities.
- Support early-stage Web3 products.

PROJECTS

Raven Network — Founder & CEO Live

My flagship company. Raven Network is an African Web3 and AI contributor network that connects emerging talent to global opportunities — giving contributors learning pathways into the industry and giving companies access to a vetted community of developers, creators and marketers.

Talent infrastructure for Web3 and AI · Contributor network · Learning pathways · Talent Board · Campaign management · Ecosystem partnerships · Opportunities & contributor growth

https://www.ravennetwork.io/

TON Agent Network — Builder

An AI agent marketplace that runs as a Telegram Mini App on TON. Users connect a TON wallet and pay for agents on-chain, and developers list their agents in a shared registry.

Agent marketplace · Telegram Mini App · On-chain TON payments · Developer agent registry

https://github.com/devmustee/TON-AGENT-NETWORK

TON Meme Xpo — Builder Live

A TON ecosystem discovery and community engagement platform for memecoins — helping communities surface tokens, vote, and stay engaged every day while giving projects visibility across the ecosystem.

Token discovery · Community voting · Daily engagement · Referral systems · Leaderboards · Ecosystem visibility

Votmass TV — Builder

A digital media and online television platform focused on leadership, governance, youth development, education and streaming content, with live TV, movies, documentaries, podcasts, news and short-form video in one Progressive Web App.

Live TV · Movies and documentaries · Podcasts and news · Short-form video · Progressive Web App

https://votmass-tv.vercel.app

Raven Wallet — Founder Beta

A non-custodial, TON-based multi-chain wallet for storing, managing, trading and bridging assets across blockchains from one interface — built for both everyday users and advanced traders. A separate product from Raven Network's talent business.

Multi-chain wallet · Non-custodial · Trade & bridge · TON-based

TECHNICAL SKILLS

Software Engineering

Software engineering (MSc) | Computer engineering (BSc) | Software & AI engineering | Cybersecurity operations | TypeScript | JavaScript | Python | HTML & CSS | Full-stack software development | Software & product architecture

Frontend Development

React | Next.js | Redux Toolkit | Tailwind CSS | Vite | TanStack Query | React Hook Form + Zod

Backend, APIs & Data

Node.js | Express & REST APIs | MongoDB / Mongoose | Prisma ORM | Authentication (NextAuth) | Telegram bots | Server-side templating (EJS)

Blockchain Engineering

TON ecosystem | EVM chains | Solana | Non-EVM chains | Multichain development | Token verification (TON Assets) | TON SDKs (@ton/core, @ton/ton, @ton/crypto) | TON contract tooling (Blueprint, Sandbox) | Blockchain integrations | Web3 product development

Development Tools

Git & GitHub | Testing (Jest, Vitest) | AWS S3 | Error monitoring (Sentry) | ESLint & Prettier

Product & Technical Leadership

Product strategy | Technical strategy | Developer relations | Ecosystem strategy | Technical mentorship | Community & ecosystem growth | Web3 marketing & growth

MENTORSHIP

Mentoring founders and technical teams from idea to product, including as a TON Nest mentor. Self-reported: advised and supported 200+ projects building on TON and onboarded 300,000+ people to TON across Africa.

Product ideation · MVP planning · Technical direction · Blockchain integration · TON ecosystem onboarding · Token & ecosystem positioning · Go-to-market strategy · Growth strategy · Community building · Developer engagement · Startup mentorship · Ecosystem opportunities

SPEAKING & EVENTS

- Pixelfest 2024 — Building on TON & Telegram
- Idea TON 2024 — Representing Bitget Wallet
- Web3 Global Conference — Representing TON
- Organised 6+ TON community activations across Africa, attended by 3,000+ people.

COMPETITIONS & RECOGNITION

- Top 3 global TON KOL · most influential, 2024 & 2025
- $200,000+ earned from the TON ecosystem
- Work noticed by Pavel Durov
- TON Cycle — placed in 3 rounds
- TON Hackers League — semi-finalist
- TON global hackathons — Asia, Europe, the Americas & Russia
- Awarded a ticket to The Gateway, Dubai 2024
- TON Nest SBT badges — levels 1, 2 & 3
- TON Identity reputation: Developer 42, Telegram User 20, Identity User 60 (identityhub.app/devmustee)

LEADERSHIP & IMPACT

Web3 community building · African developer ecosystem growth · Developer onboarding · Technical education · Community leadership · Mentorship · Founder engagement · Ecosystem marketing · Global technology partnerships · Web3 content creation
